Following his emergence from Avengers Tower,
                              Ultron then recruited the Maximoff siblings, who

from uploading his consciousness into the body thanks to Wanda, who realized, just in time, his intention to kill every human being on the planet. Instead, with the Avengers retrieving the body themselves, Thor helped bring it to life inhabited not by Ultron, but by the reconceptualization of Tony's AI, JARVIS. Thus, Vision was born, proving to the skeptical Avengers that his intentions were pure when he was the first one among them, save Thor himself, who was fully capable of lifting Thor's hammer.</p>

When Thanos' agents came for the Time Stone that Strange possessed, Strange was taken onboard their ship, with Iron Man and Spider-Man, who had come to help, both stowing away on the ship. Freeing Strange from captivity, Iron Man declared Spider-Man was now officially an Avenger, as the trio traveled to Thanos' long dead home planet of Titan, where they encountered Guardians of the Galaxy members Star-Lord, Mantis, and Drax.</p>
                    <p data-aos="zoom-in-right">Knowing the Mind Stone needed to be destroyed to keep it from Thanos, a plan was devised to safely remove it from Vision first, which required the technological expertise of Wakanda. With T'Challa agreeing to help, Rogers' expanded group traveled to Wakanda and readied to fight alongside T'Challa himself, Barnes, and the mighty forces of the country, as Thanos sent an army to retrieve the Mind Stone. A massive battle broke out, with the Avengers receiving crucial aid by the timely arrival of Thor, who also finally returned to Earth, having crafted a powerful new weapon, the axe called Stormbreaker, to take down Thanos. Thor and his Guardians of the Galaxy friends Groot and Rocket helped turn the tide, with

also wrest his Infinity Gauntlet, which
                            he was using to harness all of the stones, from his
hand. Unfortunately, even with Thanos'
                            vengeful daughter, Nebula, joining their fight, this
plan would fail. When Thanos nearly killed

asking if they just lost.</p>

their arrival turning the tide of the
                                battle. However, when Thanos arrived, he was able to
get the Mind Stone, the last of the

fingers, he ended half the life in the universe,

along with many others on the battlefield.

Mantis, and Drax, leaving Rocket as the last

                        <p data-aos="zoom-in-right">However, the government
pulled its funding from the project shortly
                            before Reed completed his work. Desperate to test the
ship before it was dismantled, Reed, Sue,
                            Ben, and Johnny broke into the official facility and
launched an unauthorized flight. Their
                            mission was seemingly a success, but the ship's
shields failed to protect them from a massive
                            dose of cosmic radiation. The vessel subsequently
crashed back to Earth.</p>
                        <p data-aos="zoom-in-right">All four friends survived the
experience, but Reed found his body had
                            taken on elastic properties that allowed him to change
his size and length. Susan gained the
                            ability to turn invisible while Johnny attained
control over fire. Tragically, Ben's enhanced
                            strength and durability gave his skin and body a rock-
like appearance that robbed him of the
                            ability to pass as human. Despite the sudden turn of
events, the quartet realized the potential
                            of their powers and chose to become a team.</p>

                    patriarch of both the family and the group. Susan eventually chafed under Reed's authority and
                    left both him and the FF for a time. When she returned, Susan had a more equitable say in their
                    personal and professional lives. Over time, Johnny and Ben have also gained bigger roles in the

romantic relationships with the Thing and
                            She-Hulk, respectively. Johnny's ex-wife, Lyja, was
also close to the group even after she was

impersonated Alicia for an extended period.

team when Reed and his "father" were

nearly incapacitated the crew, but Ben was

fatalities. As the four emerged from the ship,
                            they realized that they had been irrevocably changed

cows before forgetting their true selves.
                            The group didn't attempt to hide their identities, and

                            of his arguments with the team, Johnny encountered a
vagrant who looked remarkably like Prince
                            Namor, the Sub Mariner. Although Namor had no memory
of his previous life as a prince of
                            Atlantis and a World War II hero, Johnny sparked his
memory by burning his excess hair away and

                    <p data-aos="zoom-in-right">Johnny's stunt spectacularly
backfired when Namor discovered Atlantis
                            was in ruins and he declared war on the surface world
in retaliation for his loss. The

Sub-Mariner became one of the FF's first recurring foes, even though he clearly had romantic
                        feelings for Susan. However, Namor's threat paled in comparison to the emergence of Victor von
                        Doom. Reed's college rival returned as Doctor Doom and forced the team to travel back in time
                        for his plans. Although the FF defeated Doom in their initial encounter, he went on to become

                        Master's blind stepdaughter, was used as a pawn in his first strike against the team. However,
                        Alicia formed a bond with the Thing and a romance slowly bloomed between the two.</p>
                      <p data-aos="zoom-in-right">Wizard, Sandman, the Trapster, and Medusa formed the first Frightful

                        married in the Super Hero social event of the season. Even Doctor Doom's attempt to overrun the
                        wedding with Super Villains couldn't completely disrupt the Richards' big day.</p>
                      <p data-aos="zoom-in-right">The Inhuman known as Gorgon eventually located Medusa and attempted to

                        their burgeoning relationship. The FF and the royal family ultimately united against the threat
                        of Black Bolt's brother, Maximus the Mad. In the aftermath, the Inhumans were cut off from the

and heartbroken.</p>
                        <p data-aos="zoom-in-right">Soon after, Uatu the Watcher
went to great lengths to hide the Earth
                            from Galactus and his herald, the Silver Surfer. When
the FF confronted the Surfer, they were
                            unable to prevent him from summoning Galactus to
devour the world. Alicia befriended the Surfer
                            as he recovered from the Thing's attack and allowed
him to see the good in humanity. Meanwhile,
                            Uatu sent Johnny on a mission inside of Galactus' ship
to retrieve the Ultimate Nullifier, a
                            weapon powerful enough to annihilate even the cosmic
giant—and the Earth itself.</p>
                        <p data-aos="zoom-in-right">Anspired by Alicia, the
Silver Surfer turned against his master and
                            acted in defense of the Earth. In response, Galactus
banished the Surfer behind an impenetrable
                            barrier that prevented him from returning to the
stars.</p>
